

Supplementary Methods

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
library(magick)
```

Linking to ImageMagick 6.9.12.93

Enabled features: cairo, fontconfig, freetype, heic, lcms, pango, raw, rsvg, webp

Disabled features: fftw, ghostscript, x11

```
#  
img <- image_read("Graph1.png")  
#  
print(img)
```

```
format width height colorspace matte filesize density  
1      PNG  1540    951          sRGB FALSE   166844   72x72
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
